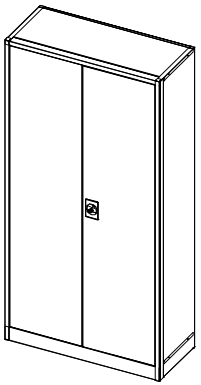
**Finish**



**Dimension**

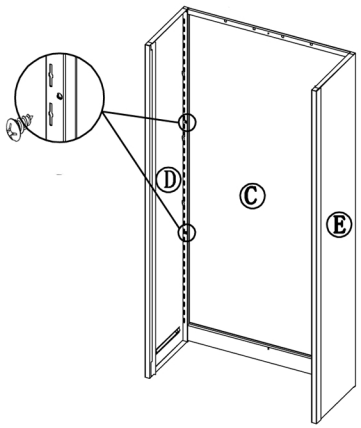
**HDC-06A**

**H × W × D**

**1800×900×390**

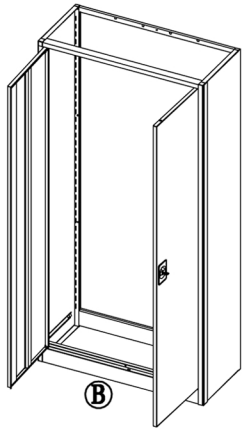
## Step 1

Hook left and right sides behind rear panel, secure with 2 screws on each side.



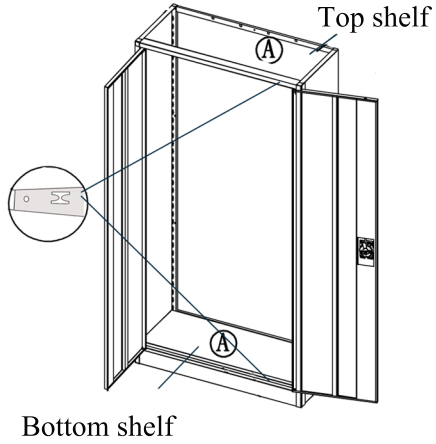
## Step 2

Stand the assembled door inside the side walls.



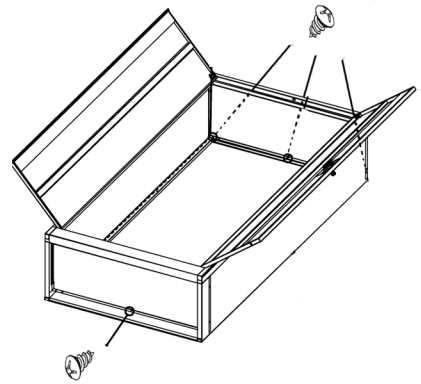
## Step 3

Ensure walls are square and place bottom shelf inside, push down to lock in place. From inside the cabinet raise top shelf and push firmly into



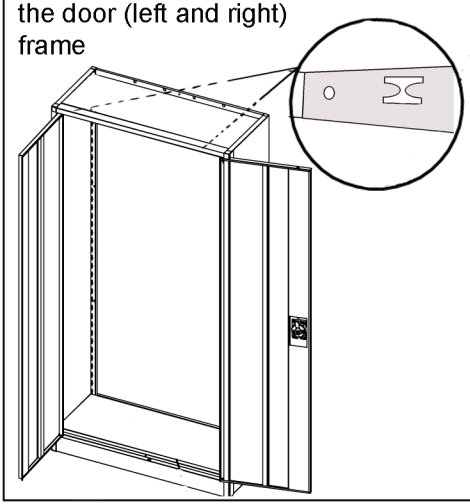
## Step 4

Lay cabinet flat, secure the rear of the top shelf and the bottom shelf using the remaining screws.



## 5 step

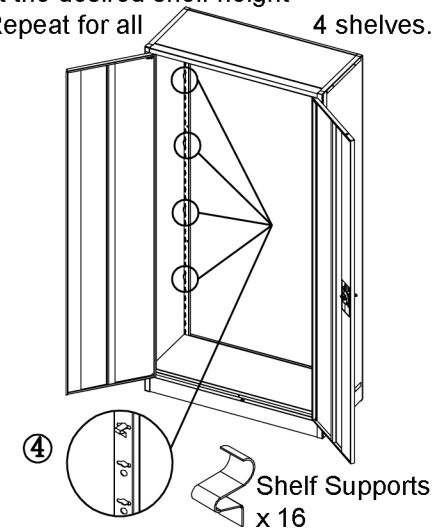
Secure the front of the top shelf by pushing the “H” shaped tabs from inside the cabinet through the hole in the door (left and right) frame



## 6 step

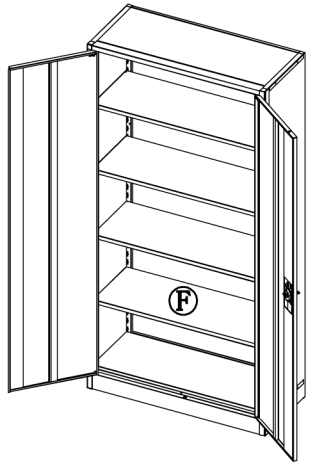
Place one shelf support in each corner at the desired shelf height

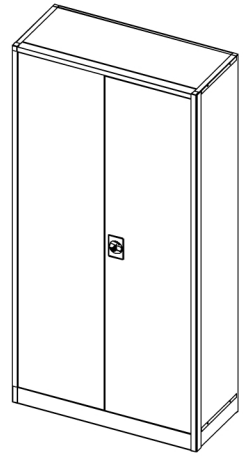
Repeat for all 4 shelves.



## 7 step

Slide shelves in to rest on shelf supports



## 8 step


Done!
